

### SCRAPS GOOD FOR CHICKENS

Parings Left From Potatoes, Pumpkins, Squash, Apples, Etc., Make Excellent Feed.

Save all the parings, potato, pumpkin, squash, apple, etc., and when you are cooking your noonday meal cook these for the chickens. When it has cooled, stir in enough wheat bran to make a stiff mash. This makes an excellent but economical dinner. Give them an occasional mess of parings chopped fine without cooking. Turnips and beets are much relished by the fowls when eaten green.

If you have cabbage, take a small-sized head, fasten it to a wire and hang low enough that the fowls can reach it easily. You will be surprised to see how quickly they will clean up a cabbage in this way.

Don't feed your fowls milk in the watering trough. Have a separate trough for each. Be sure to feed a panful of milk each day.

Don't forget to water fowls when the weather gets cold. Milk doesn't quench their thirst, as I have often seen them turn from a pan of milk to the watering trough and drink an enormous quantity.

Keep a dust box in the henhouse when the hens are confined.

### MOST PROLIFIC EGG LAYERS

What Chinese Breed of Geese Lack in Size They Make Up in Egg Production—Are Quite Hardy.

Apparently what the Chinese geese lack in size has prevented them from becoming favorites with those who raise large numbers annually, but with those who keep a limited number

White Chinese Geese.

they are found to be very practical. What they lack in size they gain in egg production, being the most prolific of all breeds of geese, averaging from 50 to 60 eggs a year. In size, aptitude to fatten, and ease of management they appear in no respect inferior to other geese, while the quality of flesh is decidedly superior.

They are exceedingly graceful in appearance, quite hardy, and the young mature early. There are two varieties of Chinese geese—the Brown and the White. They have medium-sized heads, with large knob at base of a medium-length bill, and long, gracefully arched neck. The backs are medium in length, and the breast is round and full; body of medium size, round and plump; wings large and strong; thigh bones short and stout, and shanks of medium length.

### EXERCISE FOR LAYING HENS

Erroneous Impression Prevails Among Certain Poultrymen That Fowls Should Be Kept Moving.

The matter of exercise for laying hens is one of great importance to the breeder, and one which means much to the man who is producing eggs for the market only. There is a common impression prevailing among certain unenlightened poultrymen that fowls should be kept on the move all day long, but this is extremely erroneous, especially in the case of winter egg production, and it has been proved most conclusively that a fowl will lay more eggs at a lower cost when not required to take an excessive amount of exercise.

**Chickens to Fatten.**  
Chickens of from three and one-half to four and one-half pounds are the most profitable to put in the fattening crates. Two parts oats, one part buckwheat and one part corn, all finely ground, mixed with sufficient buttermilk to make a batter, makes an excellent ration for crate feeding. With suitable birds an increase of one pound may be expected from three to five pounds of meal fed.

**Make-Up of High Producer.**  
The bird that is a high producer must have a vigorous appetite and a large capacity for converting food materials into eggs.

### SPECIFIC ACTION OF GERMS

Results of Some Interesting Experiments That Were Made by Famous New York Physician.

In a lecture before the New York Academy of Medicine, Doctor Rosenow gave an interesting and convincing account of his experiments with germs taken from diseased organs in various parts of the body. He showed that bacteria taken from ulcers of the stomach, appendices, infected gall-bladders and rheumatic joints, when injected into animals in the majority of instances caused infection and inflammation in the localities corresponding to those from which they had been taken. For example: Out of 59 animals injected with the germs taken from cases of appendicitis, 41 developed appendicitis. Out of 79 animals injected with the germs from ulcer of the stomach, 50 developed ulcer of the stomach, 47 showed hemorrhage. Out of 27 animals injected with germs from inflamed gall-bladders 22 developed gallbladder affection. Out of 71 animals injected with germs derived from cases of rheumatism, 47 developed joint affections, 33 developed inflammation of the lining of the heart, a frequent complication of rheumatism, 33 developed myocarditis, inflammation of the heart muscle, and 19 developed pericarditis, inflammation of the membrane surrounding the heart, 28 kidney affections, 19 peritonitis.

### DEFENSE OF THE FAIRY TALE

Writer Points Out Its Importance in the Scheme of Education of the Child.

Ignorance of fairyland is the punishment of intellectual vanity—the vanity of the average pedagogue, who has forgotten that education means leading forth and not stuffing in.

It is the vanity of the physiologist who, forgetting that the germ-plasm is a faculty of influence and enterprise, not an arrangement of molecules, thinks to create it in a test-tube.

It is the vanity of the eugenicist who believes he will improve upon those ancient ways of life which, for a few ages before Mendel and Weissmann, managed, all untutored, to evolve a reverent man, something more marvelous than these modern academic things who seem so ignorant of their native virtues.

To the fairy tale we must often look, if we are to mend our ways with the child and lead him forth to find that mighty world, that true self, which is the idea of him laid up in the heart of God.—New York Telegram.

### Daily Housework Outline.

An outline of a system of housework was the request made not long ago by a bride-to-be, who wished some directions published for her guidance in housekeeping. The variation in the needs of different households makes a universal rule impracticable, as was suggested to the inquirer at the time; but she may find some help in a daily outline given by Miss Parloa, a noted authority on household matters. Miss Parloa says: "Make the fires, air the dining room and hall. Prepare the breakfast and set the table. Air the bedrooms while the family is at breakfast. Remove the breakfast dishes; put away the food. Sort the dishes and put to soak all dishes and utensils that have had food in them which is liable to stick. Put dining room and sitting room in order, airing them well. Wash dishes, put kitchen and pantries in order. Prepare dishes that require slow cooking and put them to cook. Make beds and put sleeping rooms and bathroom in order. Trim lamps. Dust halls and stairs; sweep piazzas."

### A Gem in Its Way.

This, slightly deleted, is from the erstwhile sedate Outlook, which was wont to frown upon levity as severely as the rest of us do on the deadly up-as-tree of the tropics or the equally dead singletree of the more temperate zones:

"You can get relief from bunions by walking pigeon-toed. A bad case of pigeon-toes can be cured by walking bowlegged. The remedy for chronic bow-legs is to walk knock-kneed. Should knock-knees bring pigeon-toes again, one can, of course, always escape back to bunions."

### Painting Walls.

Before paint or calcimine is applied to walls every crevice should be filled with plaster or cement. To the calcimine put one-quarter pound white glue in cold water overnight and heat gradually in the morning until dissolved. Mix eight pounds of whiting with hot water; add the dissolved glue and stir together, adding warm water until the consistency of thick cream. Use a calcimine brush and finish as you go along. If skim milk be used instead of water the glue may be omitted.

### One Way to Make a Friend.

There are several kinds of hypocrisy, but the one that masculinity most favors is spurious devilishness. Nothing brings the beam of contentment so fervently to the mediocre eye as a Don Juan accusation. Dig him in the ribs and wink as you call him a sly dog—and he loves you. He may be the quintessence of domestic respectability, but if you will but insist that you believe him capable of maintaining a seraglio with consummate deceit, you are his friend.

### What Splendid Light the RAYO Gives!

ITS glow is so soft and bright that you can read all evening without tiring your eyes. The

### Rayo Lamp

is the most popular kerosene lamp ever made.

—because it gives a clear, powerful, mellow light

—because it is easy to clean and light

—because it is durable, good looking and economical

Use Aladdin Security Oil or Diamond White Oil to obtain best results in Oil Stoves, Lamps and Heaters.

The Rayo is only one of our many products that bring comfort and economy to the farm.

## J. B. WHITE & CO.

AUGUSTA, GEORGIA

## Household Needs

in FURNITURE and HOUSE FURNISHINGS we have at our two stores, and we extend a very cordial invitation to our Edgefield friends to visit us when they come to the city.

We have never before been in a better position to supply your needs, and that too at very low prices. We have bought in very large lots for the fall trade, believing that there would be a return of normal business. We have not been disappointed. Our business has been large, and we invite you to join the procession that flocks to our store for dependable goods at living prices.

Everything in Furniture that can be named is here. It is not necessary to mention each item. Everything in House Furnishings is also here for your inspection.

Come in to see. We prize our Edgefield friends, and will always welcome them most cordially.
